## etwork Infrastructure and Managed Services

Sharing timely information is essential in today's competitive, connected environment. The phrase "the network is down" can bring business to a halt or turn potential clients away. Choosing the right technology partner to assess, design, or manage a network infrastructure is critical—yet many organizations do not know where to turn for this expertise.

### Assessment, Planning, Implementation

Cohn Consulting Group, a division of J.H. Cohn LLP, provides networking and software solutions to middle-market companies in a variety of industries—many without the resources of a dedicated IT staff. From one-day network assessments to broad-scale implementations integrating diverse systems, our methodology ensures that the most cost-effective, appropriate solutions are used. Our team works with organizations to either maintain or upgrade current systems or to design and install data networks to keep pace with growth. We make sure that our clients have the best hardware and configuration solution for their unique situation in terms of cost, scalability, and security.

### Managed Services

To keep client computing infrastructures running smoothly, we offer a managed services model wherein we remotely monitor a network to ensure its continuous availability, optimal performance, and stringent security. The advantages of this outsourcing model include the ability to anticipate, detect, and remedy problems before the computing infrastructure is compromised.

### Technology Services

- Network Administration
- Desktop Support
- Network Security
- Back-Up and Disaster Recovery Solutions
- Anti-Spam Solutions
- Remote Access Solutions
